STEFAN BRUNOTTE

Junior Full Stack Developer C#
https://stefanbrunotte.azurewebsites.net/

About me

Are you looking for an entry-level C# developer that is multi-talented with lots of experience from different fields? Well, here is a great opportunity – meet me, Stefan Brunotte.

I am a junior full stack developer with C# as my main language. When combining my scholar qualifications with my work experience you will find a person with great people skills, and great knowledge both from the banking/trading-, real estate areas, and service fields.

I see myself as a senior C# developer in 5 years, within these years I have developed a stable and solid knowledge base that will make me capable of jumping into complex code that will meet customer/employer expectations.

As an employer you will get a hard-working asset that is focused on delivering the best possible work!

Most Significant Experience

All projects can be viewed at https://stefanbrunotte.azurewebsites.net/
all code is available at my GitHub page: https://github.com/MrBrunotte

Lexicon **C# ASP.NET Core MVC** **20/08/20 – 15/01/21**

C# ASP .NET Core MVC 7 module course.

The modules cover:
C#, ASP .NET Core MVC Framework, Web applications, Database (Entity Framework), Testing, REST API, SCRUM, Azure AZ-900 certification (Azure).

Experience gained:
Throughout the course I have gained a good understanding of the underlying pillars of OOP and C# as a language. The projects in the course have given me a good understanding of ASP .NET Core framework and Visual Studio. I am now able to build full stack web applications using C# and ASP .NET Core Framework including Entity framework and MySQL.
When building the project, we followed the SCRUM framework.

Code Institute, Dublin Ireland **Full Stack Developer** **02/2019 – 06/2020**

Fully remote course that covered: Front-, Backend and Database management.

Covered in course:
Python, JavaScript, jQuery, Django and Flask frameworks, MongoDB, SQLite, Heroku Postgres, Heroku deployment, Bootstrap, Materialize, APIs.

Experience gained:
Throughout the course I learned to work remotely and independently. The course covered all three aspect of a Full Stack Web Developer. Three projects were deployed during the course and they are available at my homepage.

Stockholm School of Economics **Master Banking & Finance** **08/2009 – 06/2011**

Advanced theories and methods of financial analysis.

Covered in course:
Portfolio Theory, Corporate Finance, Financial Derivatives, Fixed Income Securities, Econometrics, Master Dissertation in Finance.

Experience gained:
Both theoretical and practical of finance in a global context, the program also gave me a solid foundation to stand on in my private day trading career. This will also benefit me as a developer since I have a good knowledge of this industry.

Skills & Tools

Main Language
C#
- *ASP .NET Core MVC*
- *Entity Framework*
- *LINQ*
- *REST API*

Other language
Python
- *Django*
- *Flask*

JavaScript
HTML5
CSS3

Database
MySQL
MongoDB
Heroku Postgres

Version Control
Git
GitHub

Cloud
Azure
AWS

IDE
Visual Studio 2019
Visual Studio Code

Frameworks
SCRUM
Bootstrap
Materialize

Programs/UX
Adobe Xd
DrawIO

Academic Qualification

AZ-900 Fundamentals
Microsoft Azure Fundamentals

C# ASP .NET Core MVC
Lexicon
7-module course ASP .NET Core MVC

Full Stack Developer
Code Institute, Dublin Ireland
Frontend, Backend, & Database management

Programming 1 Basic C#
Komvux course
Basic C# concepts
